MOHAMED NOURELDIN

AI Engineer | Full Stack Developer

Location: Luxor, Egypt | **Phone:** +20 1014934909 | **Email:** mohameddnourr235@gmail.com
LinkedIn: linkedin.com/in/mohamed-nour-1551a6284 | **Portfolio:** portifolio-mohamed.vercel.app

ABOUT ME

Computer Science and Artificial Intelligence graduate with experience in frontend and full-stack web development, alongside academic and practical AI projects. Experienced with modern web technologies, debugging, UI/UX improvements, and backend integration. Strong leadership, communication, and problem-solving skills with a continuous desire to learn and grow professionally.

WORK EXPERIENCE

Full Stack Developer — Novagates

15 Aug 2026 – 3 Oct 2026

- Worked across frontend and backend areas of a large web application codebase.
- Investigated and fixed software issues, supporting application stability and existing feature workflows.
- Contributed to feature maintenance and frontend/backend integration within the development team.

Frontend Developer — Molicode Pixel

Sharqeya, 10th of Ramadan | Nov 2024 – Apr 2026

- Improved website UI/UX and fixed frontend bugs.
- Enhanced performance and responsiveness of web applications.
- Worked with HTML, CSS, JavaScript, TypeScript, Bootstrap, and React.
- Collaborated with team members to deliver high-quality web solutions.

Frontend Developer — New Code

Sep 2023 – Dec 2023

- Worked on frontend development and implementation of website interfaces.
- Helped refine page layouts and user-facing components for a consistent user experience.
- Supported frontend issue fixing and interface improvements.

SELECTED PROJECTS

ERP System — SAHABA
- Developed ERP frontend using React for inventory and sales management.

Qanun Plus — Legal Platform
- Developed a full-stack legal services system and implemented backend integration and system features.

Hodna Store — E-Commerce Website
- Built a full-stack e-commerce platform using React and Python.

ExamGuard — AI Monitoring System
- Built an AI-powered exam monitoring system using computer vision; implemented face, gaze, and suspicious behavior detection.

Nexus AI — Chatbot
- Developed an NLP-based chatbot for automated responses.

Search Engine Project
- Built an academic search engine using indexing and ranking techniques.

SELECTED PROJECTS — CONTINUED

Hamza Suit — Sales & Rental System
• Built a POS system for suit sales and rentals; implemented inventory, rental tracking, and invoicing.

AI Voice Plate Recognition
• Built an AI system for Arabic voice-based vehicle plate recognition, including speech processing and plate validation.

Transportation ERP System
• Built an ERP system for fleet and transportation management, including trips, fuel, maintenance, and vehicle tracking.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript

Frontend: React, HTML, CSS, Bootstrap

Backend: Flask, FastAPI, PHP, Laravel

Databases: MySQL

AI & Data Science: Machine Learning, Deep Learning, NLP, Computer Vision, OpenCV, YOLO

Tools: Git, GitHub, VS Code, Jupyter Notebook, Figma

EDUCATION

Bachelor's Degree in Computer Science and Artificial Intelligence
South Valley National University | Oct 2022 – Jun 2026 | GPA: 2.4 / 4.0 — Good

COURSES & TRAINING

Frontend Development (Coursera) • Neural Networks & Deep Learning (Coursera) • Problem Solving & Decision Making Skills (Edraak) • Data Science & Machine Learning (Edraak) • Introduction to AI (NTI) • Introduction to PHP & MySQL (MaharaTech)

SOFT SKILLS

Problem Solving • Teamwork • Communication Skills • Team Leadership • Time Management

LANGUAGES

Arabic: Native | English: B2

MILITARY STATUS

Exempted from Military Service
